

## Mazda MX-5 Cup Competitor Information Bulletin #2023-06-09

This CIB describes: Engine Oil management at Watkins Glen and Virginia International Raceway

Please be advised of an important technical consideration regarding the Mazda MX-5 Cup Cars during the upcoming races at Watkins Glen and VIR. The nature of the long duration and high load corners at these circuits poses a potential risk of oil starvation.

It is crucial that all teams monitor their oil levels diligently after each session. Due to the prolonged exposure to lateral forces, teams need to review their data, pay close attention to their oil level and take appropriate measures to maintain an adequate level to prevent engine damage or failure.

Should you have any further questions or require additional information, please do not hesitate to contact us at the information below.

Good luck and safe racing!

Sincerely,

Flis Performance
